Sprint 1 Review Document

February 28, 2021

Features Implemented:

Foundational code created.

Kanban on ZenHub created.

Issues Fixed:

N/A (No issues to fix).

What went well during implementation:

Creating pushing new files to new branches, creating foundational code for application.

What problems occurred:

There was trouble fully utilizing Android Studio without creating a new repository. This is still a work in progress, we plan to make more progress on this front during the next sprint.

Changes made:

Created Sprint Backlog and Project Backlog.

What will be done for next sprint:

Integrate Android Studio into GitHub repository.

Update README.

What went well in SCRUM:

A board was created on ZenHub, and access was given to all team members.

What could be improved:

We may benefit from closer and more organized communication via this platform.

SCRUM changes to be made:

We will define specific roles of Product Owner, Scrum Master, and Development Team in future sprints, alternating the roles between sprints so everyone has an opportunity in each role.
